IBIS® | **CLEARCASE™**

**ACCELERATE
YOUR CRIME GUN
INVESTIGATIONS**
with Ease, Objectivity
and Reliability

IBIS® ClearCase™ is a fully automated cartridge case triage solution and a revolutionary advancement in crime gun investigation because it:

- Does not require specialized training to operate.
- Streamlines the entire triage and initial ballistic analysis process.
- Delivers unbiased, reliable results within minutes.

MAIN FEATURES

Easy to Use

Includes user-friendly web and mobile apps and an acquisition unit with an intuitive touchscreen. No specialized training required.

Based on Proven Technology

Builds on 30+ years of innovation in ballistic identification. It uses proven, state-of-the-art IBIS algorithms.

Streamlined Triage

Processes cartridge cases swiftly, turning days or weeks into minutes. The infinite-loop carousel handles an unlimited number of casings with ease.

Trace Evidence Preservation

Preserves DNA, fingerprints and gunshot residue. Evidence collection and ballistic analysis are simplified, not compromised.

Actionable Insights

Provides immediate investigative insights, identifying the number and caliber of firearms involved. It also recommends the ideal cartridge cases for submission to your ballistic identification network (e.g., NIBIN).

ClearCase is the future of rapid crime gun intelligence, designed to meet the increasing challenges of law enforcement with unmatched ease and reliability.

KEY BENEFITS

Time Savings

Significantly cuts down the amount of time to process evidence from a crime scene.

Cost-Effectiveness

Reduces operational expenses; annual fee includes hardware, software, ongoing maintenance, and 24/7 support.

Reliability

Delivers consistent and reliable results.

Scalability

Processes an unlimited number of cartridge cases.

Operational Efficiency

Streamlines the triage process and seamlessly integrates with existing investigative workflows to improve overall efficiency.
